

# Give a Gift that Sustains

Wondering what to give a friend or relative this Xmas?

**Give them a gift that gives to the environment.  
And will continue giving for decades to come.**

GROW PROJECT, in conjunction with Kuranda Envirocare, invites you to sponsor the planting and care of a tree (or six. Or sixty!) The trees are locally propagated, planted and cared for over 3 years, until they're large enough to look after themselves. At \$4 per tree that's pretty good value for a young tree, 3 years care and on-going monitoring and replacement if necessary. Trees are planted locally in designated wildlife corridors and areas, providing habitat for the endangered southern cassowary, Myola frog and other wildlife as well as improving the health of our Barron river.

GROW PROJECT community tree plantings happen once a year, on public sites to ensure they will be unhindered in growth for hundreds of years. They're monitored and maintained monthly to ensure survival and you can track the progress of these plantings via our website and newsletters. This season we hope to see our 1000<sup>th</sup> GROW PROJECT tree planted by the Kuranda Envirocare community volunteers.

You get a gift certificate to send your loved ones, showing how you've supported the environment on their behalf. And to be even more environmentally friendly, you can do all the sending by email.

Want to make your business carbon-neutral? Join our project, donate trees to offset your carbon footprint, receive the use of the GROW PROJECT logo and see your profile on our participants' web page.
