

Tree Roo Rescue and Conservation Centre Ltd

We are a non-profit organisation that rescues and rehabilitates, orphaned, injured or displaced tree kangaroos.

Unfortunately an increasing number of Lumholtz tree kangaroos are being killed by dogs and hit by cars each year.

Please donate to us and the money will go directly towards treating and caring for these beautiful animals.

If you've found an injured tree kangaroo...

Caring for Kuranda's Environment

PLANT OF THE MONTH

Licuala ramsayi – (Australian Fan Palm)

You see these palms on Rod Vievers Drive entrance to Kuranda, rescued from a Top of the Range road clearing. They have grown slowly over the years, not in ideal conditions, preferring river banks, and swamps within the rainforests.

A very beautiful palm, with a single trunk up to 15 metres, and large (to 2 metres across) almost circular leaves. These silhouetted leaves against the sky are an iconic image used in regional marketing. Being a tropical/sub-tropical plant, not frost hardy, it prefers quite heavy shade when younger, but as an emergent plant it's sun-hardy as an adult. Very slow growing, they can last for years in a patio pot, in a warm shady nook, making them an ideal gift for that (don't mention it) family celebration time. We have a few of these available for sale so come check them out. Not this big! (Photo courtesy of Palm & Cycad Societies)

It's a full program this month, with trees being planted as well.
